IN THE CLAIMS

Please replace the indicated claims with the following, marked up versions showing the changes made are attached hereto:

1. (amended) A portable transceiver of one or more signals, comprising
an input for receiving the one or more signals;
a frequency modulator coupled with the input and modulating the one or more
signals;
a splitter coupled with the frequency modulator to divide the modulated signal into
laser data signals;
a plurality of collimated lasers coupled with the splitter to receive the laser data
signals, the lasers being displaced from one another and facing in parallel directions.

27. (amended) A portable transceiver of ethernet signals, comprising
an input for receiving one of the ethernet signals;
a splitter coupled with the input to divide the ethernet signal into laser data signals;
a plurality of collimated lasers coupled with the splitter to receive the laser data
signals, the lasers being displaced from one another and facing in parallel directions.
